

## P1G Term 2 - Learning Leaflet

### Numeracy

This term we will revise numbers to 10 including recognition and formation of the numerals, before/after/between on the number line and reading the number names. The concept of addition will be introduced and using Numicon (pictured above) should help here. The SHM activity book on "Addition to 10" will be started. Information Handling activities will also feature and here we will gather, organise and display topic related information.

### Literacy

g,l,f,o,b,u,h,w,v,y and z are the sounds to be introduced this term and the reading, making and writing of phonetically regular words will be practised frequently. Correct pencil grip will again be emphasised. More pink words will be added to word boxes to help with Oxford Reading Tree texts as well as books from supplementary schemes. Remember the date for your child's Talking Box too.

## Health and Wellbeing

"It's Good To Be Green" will continue to provide a clear structure in promoting a high standard of behaviour and will sit alongside work on the "Rights of the Child" and our school values and aims. Primary 7 Buddies now have less "formal" duties but are still available to help as and when required. P.E. continues twice a week - on Monday mornings and Thursday afternoons. Outdoor play will also continue so please ensure suitable clothing and footwear are available.

## Learning Across the Curriculum

Our term 2 topic is called "From Autumn to Winter" and will include work on many of the celebrations, festivals and seasonal changes linked to this time of year. Science continues twice a week with Mr Cole-Hamilton. In French the focus will be on colours. Masterclass time will be set aside for the whole Primary 1 year group to work on "The Nativity" which will be performed in December.
